

Introducing WebReq 10

GT Management is excited to announce the release of **WebReq 10**

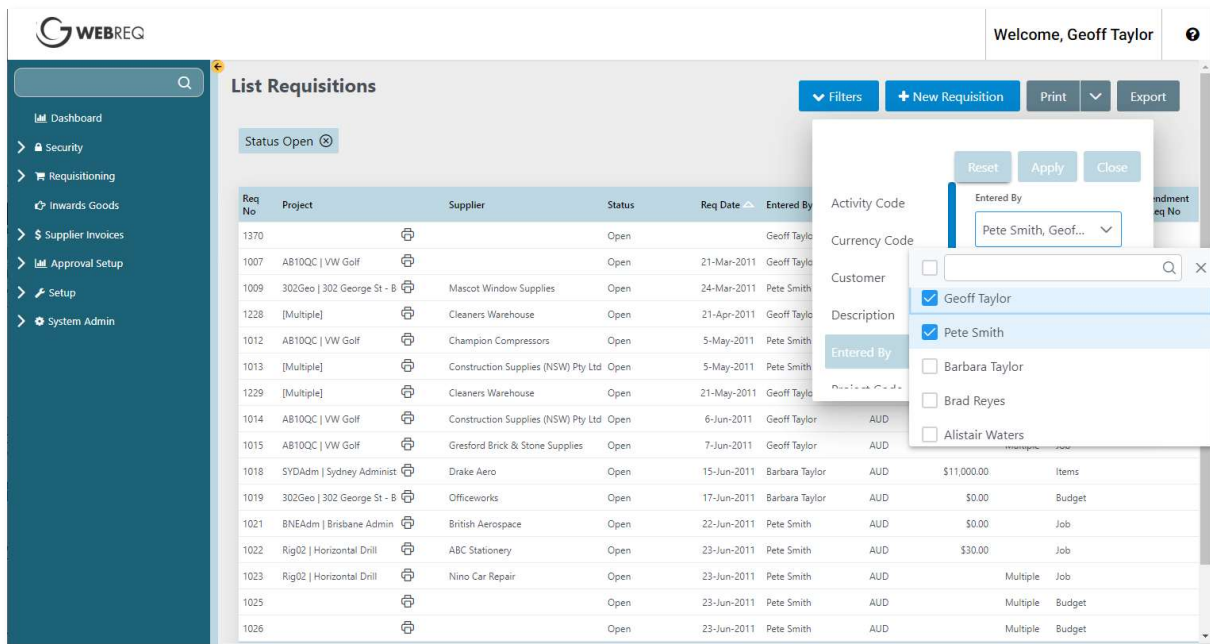

Available August, 2023

WebReq 10 is a complete redevelopment of our feature-rich online procurement application. The team at GT Management has re-created WebReq from the ground up using the latest, highly scalable web development technology to ensure WebReq's future is solid.

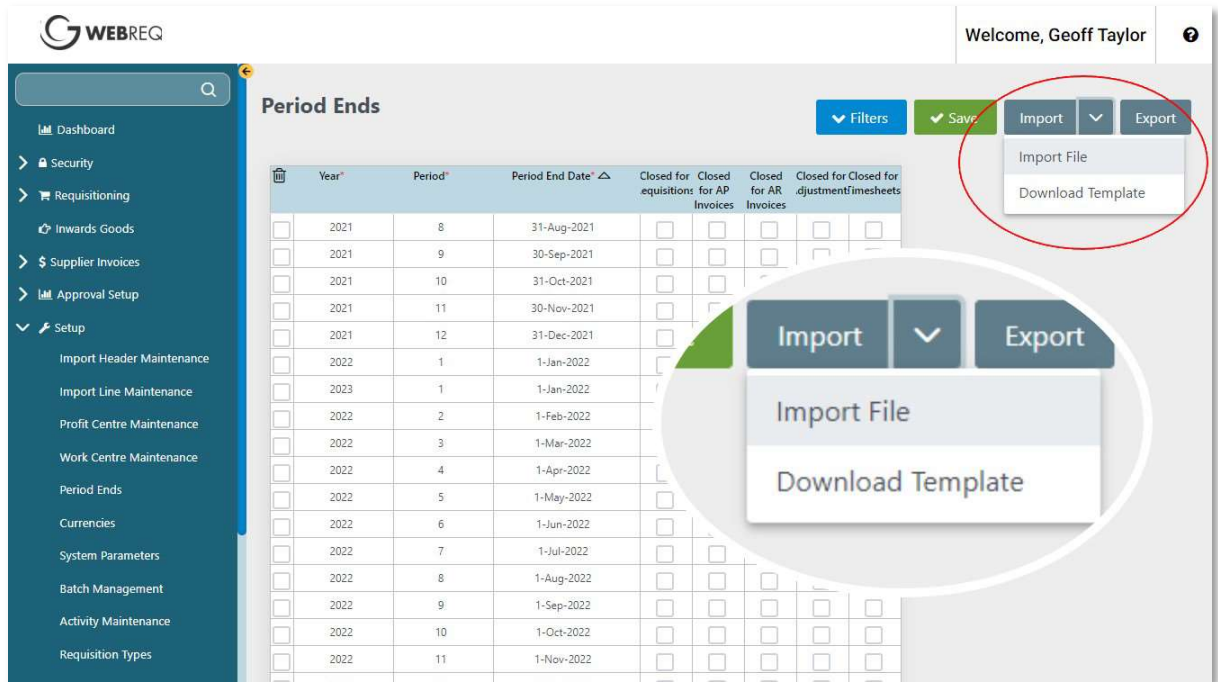

Of course, all of WebReq's well-loved features have been retained with exciting new functions included. Your WebReq processes will be more intuitive, easier to transact and very secure

This initial release of WebReq 10 covers the Purchase to Payment modules (Requisitions, Purchase Orders, Inwards Goods, Supplier Invoices, and all related functions)

Some highlights and new features of WebReq 10

- Brand new, intuitive user interface built on Angular technology
- Predictive, auto-completion of key fields using either Codes or Descriptions – no need to open up those search boxes, making for faster data entry
- Highly customisable form layouts and functions
- More accessible, intuitive and flexible administration tools
- User customisable dashboard
- A modern, robust and secure architecture, keeping your data safe and ensuring procurement rules and processes continue to be followed
- Decommissioning of the Control Panel administration tool. All configuration, batching, user setup, system setup and security functions are now contained within the one browser-based interface
- Enhanced recurring orders processing and creation
- A brand-new online help system provides context sensitive standard help from individual WebReq forms, as well as allowing for customisable site-specific content to be generated
- Enhanced reporting interface
- New common batch export form provides full control and overview of transactions for interfacing to 3rd party systems
- Enhanced document management
- More intuitive and powerful selection filtering to produce lists and reports
- Redesigned Company Maintenance (Suppliers and Clients) including the ability for changes to bank account details requiring approval.
- Import and Export of data directly to/from key listing and setup forms with import templates provided

And, of course, all your relied upon, existing WebReq features are included, with enhancements across many of these:

Requisitions

- Intuitive, rules-based Purchase Requisition through to PO creation
- Purchase Order Amendments
- Recurring Order scheduling with auto-generation
- Email based, or in-app approvals
- Powerful set-and-forget approval engine
- Automated emailing of supplier POs
- Fully customisable questionnaires and prompts based on line code type
- Multiple suppliers within a requisition, auto-generating multiple POs from a single requisition
- Multiple projects/jobs on a single a PO
- Single purchase order lines can be split across projects/jobs for easy cost spread by percentage or simple ratios
- Project and profit centre security throughout
- Works orders / sub contract entry
- Customisable labels. Displays your internal naming conventions for key fields throughout WebReq
- Comprehensive budget entry and management allowing for escalated approval requirements based on budget status
- And much more...

Goods Receipting

- Full control of inwards goods and returns
- Receipt attachment controls
- Supplier ranking

Purchase Order Control

- Overview of all orders and statuses
- Control completion of receipting and invoicing
- Powerful reporting across all purchases and requisitions – keep on top of requisitions, deliveries, commitments and payments

Supplier Invoicing + Advanced Supplier Invoicing

- Feature-rich invoice entry
- Manual entry or enforced Purchase Order allocated data entry
- Automated creation and allocation of invoices from Purchase Orders
- Powerful set-and-forget approval engine
- Email-based or in-app approvals
- Inwards Goods validation on invoice entry
- Automated creation of invoices from supplier emailed PDFs
- Auto-completion of goods receipts and purchase orders on full PO allocation
- And much more...

Financial and Systems Interfacing

- MYOB, Xero, Exo, Net Suite, QuickBooks, Attaché, Sun, and more
- Seamless full interfacing with Workbench Project Management
- Real-time approved document interfacing or Batch controlled exporting

Remaining standard WebReq modules will be released as part of **WebReq 10** throughout 2023 and beyond

PO Number	Project	Item	Activity	Description	Unit	GST Type	Qty	Unit Cost	Cost Exclusive	GST	Cost Inclusive	Rcvd Quantity	Rcvd Value	Action Required	Details
100118	105al	12mm	CDN	12 mm Bearing		10 % GST	1	\$1.00	\$4.00	\$0.40	\$4.40	0	\$0.00

100118	105al	25 mm	AirPart	25 mm Bearing		10 % GST	1	\$1.00	\$10.00	\$1.00	\$11.00	0	\$0.00		
		48Narrow	CDN	12 mm Bearing	each	10 % GST	6	\$25.00	\$150.00	\$15.00	\$165.00	0	\$0.00		
100152	105AL	12344B	DomTr	10mm Ball Joint	Each	10 % GST	1	\$150.00	\$150.00	\$15.00	\$165.00	0	\$0.00		

How to get WebReq 10 (Available August 2023)

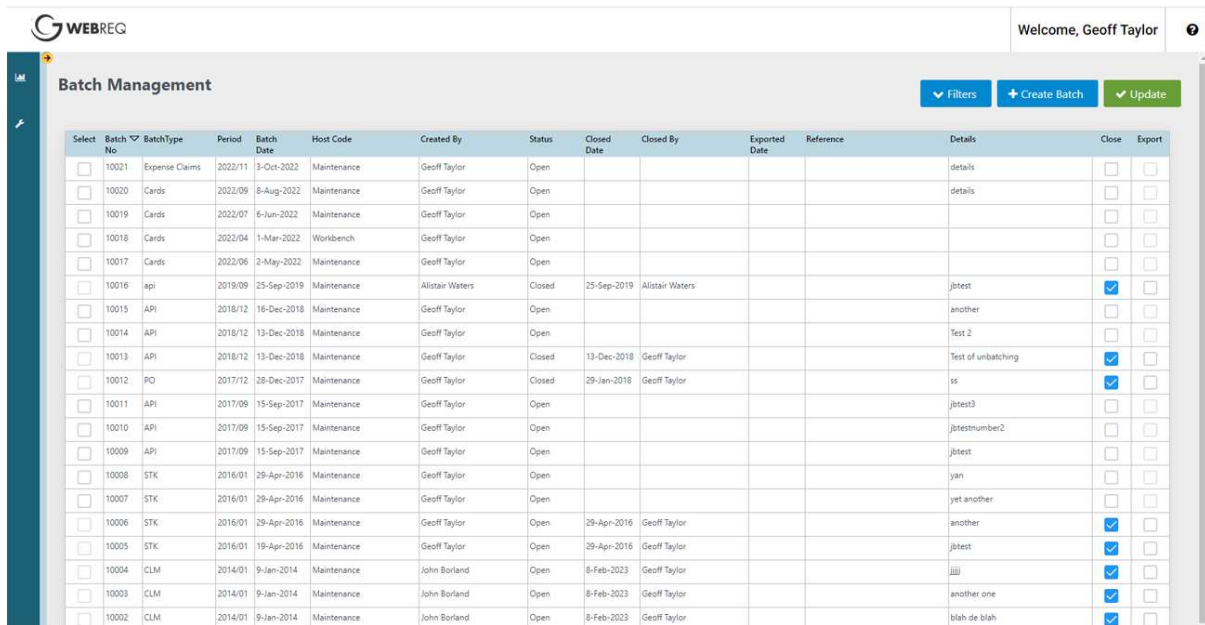

Please contact sales@gtmanagement.com.au, or Alistair Waters at alistairw@gtmanagement.com.au

We would be happy to arrange a demonstration of WebReq at a time that suits you

Please note the initial release will include the primary WebReq purchase-to-payment modules with other WebReq modules being progressed as soon as possible:

- Card Allocations
- Timesheets
- Expense Claims
- Plant Management
- Stock

We hope you are as excited as we are for WebReq 10.0

The screenshot shows the 'Batch Management' interface in the WebReq system. It includes a header with the WebReq logo, a user greeting 'Welcome, Geoff Taylor', and navigation buttons for 'Filters', 'Create Batch', and 'Update'. Below the header is a table with the following columns: Select, Batch No, BatchType, Period, Batch Date, Host Code, Created By, Status, Closed Date, Closed By, Exported Date, Reference, Details, Close, and Export. The table contains 20 rows of data representing various batches, including Expense Claims, Cards, Maintenance, and API batches, with their respective dates, statuses, and details.

Select	Batch No	BatchType	Period	Batch Date	Host Code	Created By	Status	Closed Date	Closed By	Exported Date	Reference	Details	Close	Export
